The Great Pyramids of Giza

See the Last Remaining Ancient Wonder of the World From the Air and Ground

The Giza Pyramid Complex lies on the outskirts of Cairo and consists of three pyramids, the Great Sphinx, several cemeteries and an industrial complex.

“The Great Giza Pyramid”, officially known as The Pyramid of Khufu or Pyramid of Cheops, is the largest and oldest of the three pyramids. It is believed to have been constructed between 2584 and 2561 BC and was the tallest man made structure for over 4000 years. It is the only one of the Seven Ancient Wonders of the World still in existence today.

The Pyramid of Khafre (Chephren), is built on a slope, making it appear bigger than it is. The third and smallest pyramid is known as Pyramid of Menkaure (Mycenrinus). Climbing on the pyramids is strictly prohibited but tourists can purchase tickets to go inside the ancient tombs.
